The EOSC LTDR TF seeks feedback for its last two deliverables

The EOSC (European Open Science Cloud) Long-Term Data Retention Task Force invites the community to review and provide feedback on the final two deliverables currently available in Comment mode.

- D 4.2. Current needs and challenges on data retention, appraisal, and reappraisal across stakeholders and communities

<https://docs.google.com/document/d/1uw5SZfRw30cgjxhmB6lwm8ZtEsTWCjMt/edit#heading=h.pkn5xisy6u7f>

- D4.1 Conceptual framework on the implementation of workflows concerning appraisal, reappraisal, retention and preservation of digital objects: Retention (Re) Appraisal - Iteration Logic (RRAIL)

https://docs.google.com/document/d/1XdeenbxW-ePIZIfOZHANYW39t_3H1jc/edit?usp=drive_web&ouid=105446040562995502680&rtpof=true

Community comments and feedback are welcome until **15 June 2026**.

Upcoming Conferences:

**CoreTrustSeal at the IASSIST online conference,
June 2nd-4th**

The International Association for Social Science Information Service & Technology will hold its 51st annual conference virtually to allow as many as possible to attend. Data professionals will have an opportunity to engage, connect, and collaborate around the theme of Championing Data. The CoreTrustSeal will have an opportunity to outline the changes to the requirements for the 2026–2028 period, emphasizing the organization’s community-driven

WDS webinar “CoreTrustSeal 2026–2028: Key Changes, Challenges, and Community Support”, June 10th, 2026

This webinar will provide an update on recent developments within the CoreTrustSeal certification framework. The session will introduce the 2026–2028 CoreTrustSeal Requirements, which came into effect earlier this year, and present key findings from the latest community consultation survey, highlighting areas of consensus on key changes compared to the previous version. In addition, the webinar will address recurring challenges that repositories face when meeting specific requirements, with particular attention to areas that consistently require additional guidance or interpretation. The discussion will also explore how CoreTrustSeal endorses and engages with community-led initiatives and good practices designed to support repositories in overcoming these challenges.

In case you missed it:

CoreTrustSeal at the Big Migration conference, May 12th-13th, Warsaw (Poland)

Repository managers, librarians, IT specialists and open science experts met up during The Big Migration 2026 conference, organised jointly by PCG Academia and University of Warsaw. Over two intensive days, participants from across Europe discussed the future of DSpace, migration strategies, repository interoperability, analytics, AI-powered infrastructures and best practices supporting modern research ecosystems. Sessions dedicated to ORCID, CORE and CoreTrustSeal also highlighted the growing importance of interoperability, metadata quality and trusted repository standards.

Summary of the event: <https://pcgacademia.pl/en/summary-of-the-big-migration-conference-international-experts-discuss-the-future-of-dspace-migrations/>

Feedback and comments welcome!

Please don't hesitate to contact info@coretrustseal.org if you have feedback or suggestions for us on the tool, process, website or anything else!
